Safety Device	Photocell flame monitor, 3A Fuse, Overheat prevention system, Tip-over switch
Burner Type	High pressure spray gun type
External Dimensions (H x W x D)	23.4 x 12.2 x 22.8 inches
Dry Weight	40 lbs

**Daystar provides perfect heating** with its well-honed technology for spot space heating in a large open area, and because Daystar is lightweight, it can be used virtually anywhere you need to stay warm.

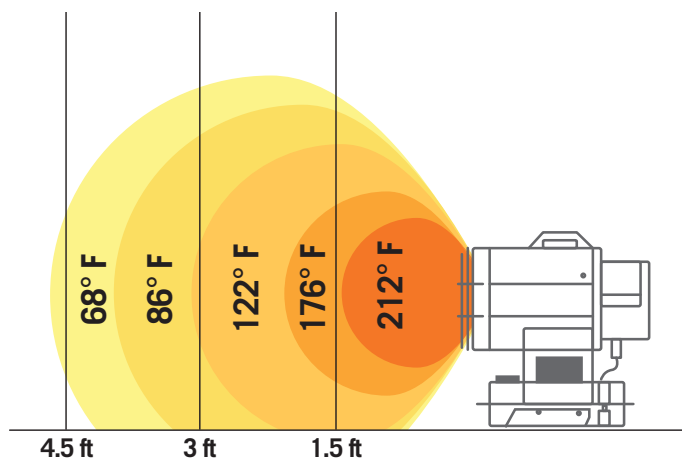

Daystar offers infrared heat as well as forced air heat and can be operated on diesel or kerosene.

The Daystar expands the VAL6 world by adopting the dual heating system of radiant heat and forced air heat. The Daystar will usher in a new era of high efficiency 'oil fired' space heating with 100% heat recovery from fuel.

## Application Examples:

- Garage
- Workshop
- Patio
- Warehouse
- Porches
- Outdoor Activities
- Factory

## Daystar's Temperature Distribution

\*Always use in a well ventilated area.
